ABOUT THE CONFERENCE

- The International Multidisciplinary Conference on Sustainability and Green Solutions (IMCSGS 2026) aims to provide a global platform for researchers, academicians, industry professionals, and students to share ideas and innovations in sustainability and green technologies
- The conference covers broad areas including engineering, management, environmental science, and interdisciplinary fields, focusing on challenges such as climate change, sustainability, and responsible technological development.
- It promotes interdisciplinary research, collaboration, and eco-friendly solutions, while helping to bridge the gap between academia and industry for sustainable development.
